

# Health Misinformation Checklist

Information that is **false, inaccurate, or misleading** according to the best available evidence at the time

Use this checklist every time you come across health-related content you are not sure about.

Did you check with the CDC or local public health department to see whether there is any information about the claim being made?

Did you ask a credible health care professional such as your doctor or nurse if they have any additional information?

Did you type the claim into a search engine to see if it has been verified by a credible source?

Did you look at the “About Us” page on the website to see if you can trust the source?

If you're not sure, don't share!

Office of the  
U.S. Surgeon General
